Which Speaking of one such instance, many types of sprouts that you are growing in water, which is super charged with life energy, take less than two days to be edible instead of the usual three days. Orgo-Life Quantum Equalizer® Technology help optimize sprouting.

In fact, methods to enhance plant growth with the addition of Orgo-Life Quantum Equalizer® Technology are very ancient. Plant growth happens better with the

natural energy sources around them rather than those compared with the normal growth without any forms of these energies around.

To enhance plant growth with Orgo-Life Quantum Equalizer® Technology and radionics is easy. You can see the results very soon. These visible results have been tested time and again by means of scientific methods.

One of the easiest methods, of course, is the treatment of the water that you use on the plants. It is evident that plants prefer living water, i.e., water that is super charged with life energy i.e. the Orgo-Life Quantum Equalizer® Technology generated water. You can achieve still better effects with water that is also programmed towards certain desired results such as resistance against specific diseases or pests.

Naturally, a week or two of using water that has been saturated with life energy on your house plants can give you the evidence that you wanted or thought of.

Another method instead of charging the water with life energy, you can also think of charging the fertilizers as well, even artificial fertilizers, in which case food that you are growing can almost gain this unmistakable fine organic generating power. Such plants, although not completely matching that which is organically grown, certainly come close to such strength!

CURRENT RESEARCH

Orgo-Life® Modules generally have positive and beneficial effects on plants and pets.

A widely reported effect among people who have been using Orgo-Life® for years; say the units help their plants grow faster and prettier.

You can get spectacular results in speed, appearance and natural taste when you use the UL-5010 Orgo-Life® unit with sprouts, plants or pets, to enhance plant growth or to revive your pet's energy.

Speaking of such an example, many kinds of sprouts that you grow in water, which is super charged with life energy, take less than two days to be edible instead of the usual three days. Orgo-Life® helps to optimize your germination.

In fact, methods for improving plant growth with the addition of Orgo-Life® technology are very old. Plant growth occurs better with the natural energy sources that surround them rather than those compared to normal growth without

any form of these energies.

Improving plant growth with Orgo-Life® Technology is very easy. You will be able to see the results very soon. These visible results have been tested over and over again using scientific methods.

One of the simplest methods, of course, is the water treatment you use on the plants. It is obvious that plants prefer living water, i.e. water overloaded with vital energy, i.e. water charged with Orgo-Life® Technology. You can achieve even better effects with water that is also programmed for certain desired results such as resistance against specific diseases or pests.

Naturally, a week or two of using Life Energy saturated water on your houseplants will give you the proof you want or think.

Another method instead of charging the water with vital energy, you can also think of also charging the fertilizers, even artificial fertilizers, in which case the foods you grow can almost acquire that unmistakable fine organic generating power. Such plants, although not completely corresponding to those grown organically, certainly come close to such strength!

CONCLUSION...

Generally speaking, the methods used to increase plant growth by Orgo-Life® Technology Units vary depending on the equipment you use, the size of the area treated and the time spent on it. Results vary depending on other natural factors that also help the plant grow.

Orgo-Life® Technology offers products of all types; The Active or Passive Orgo-Life® Technology Geo-Quantum Energy Charging Plate, the Orgo-Life® Technology Family Charging Plate, the Active or Passive Orgo-Life® Technology pyramids, etc.

Wishing you the best experience with Orgo-Life® Technology.

Sprout Growing

For example, once some people conducted a test on wheat sprouts. The one with the Orgo-Life® placed near it, sprouted at a much faster rate than its counterpart. Similar effects were observed by a person who used Orgo-Life® in

his kitchen garden. He claimed that the vegetables were bigger, and more mature when grown in a soil mixed with Orgo-Life®. While another family who grew Orgo-Life® cucumbers had such a great yield that they were unable to decide what they were going to do with the excess cucumbers.

Also, some people claimed that Orgo-Life®s helped vegetables to last for a longer time. For example, the bananas grown in the soil incorporated with Orgo-Life®, took a long time to darken than its counterparts.

There are many such benefits experienced by Orgo-Life® users. Even though, how Orgo-Life® helps in plant growth is not yet known to the people but the visible effects of it on the plants proves a lot.

Note that; that your Orgo-Life® device is handmade, they all have small mini defects, very small holes, etc... when looked at very closely 5-10 cm (2-4 inches) , but at a good distance of 1.5 feet and more, they look perfect. Due to the manual work and the polyester resin product with the Orgo-Life, it is normal to look like this. Orgo-Life is a unique technology that can only be made by hand. It is above all an artisanal product.
